EXPERIENCE

Redminds

Remote

AI Enabler Apprentice (Full-Stack Developer)

Jan 2026 – Jul 2026

- Extended a Python FastAPI microservice that uses the Gemini API to turn clinical case PDFs into new cases, adding extraction of guideline categories and bundling issues in coordination with the AI lead.
- Built case notifications for a healthcare case management platform (TypeScript, React, Node.js/Express, PostgreSQL), including 3 REST APIs for an in-app message center and status-based email alerts for QA rulings.
- Replaced a hard-coded, inaccurate due-date calculation with a new `/clinician-date` API based on state and jurisdiction, and surfaced the due date across case upload, dashboard and details pages.
- Shipped autosave for case review and edit pages, search by case or state reference number, and mobile layouts for 12 pages, adding 7 database fields with Sequelize migrations and Zod validation.

UCSC Blueprint (student-run software nonprofit)

Santa Cruz, CA

Software Developer

Feb 2024 – Feb 2026

- Built and launched **YFIOB**, a production full-stack K-12 career exploration platform for a nonprofit client, using React, Next.js, Firebase Authentication and Firestore.
- Mentored 5+ developers through code reviews, technical documentation and Git-based collaborative workflows.

PACR

Remote

Full Stack Development Intern

Jul 2025 – Dec 2025

- Integrated RESTful search APIs into 10+ React and Next.js components, reducing search latency by 35% and increasing user engagement by 25%.
- Developed 8+ production pages with persistent authentication, asynchronous data loading and responsive user workflows.

SKYIT

Remote

Backend Developer Intern

Apr 2024 – Aug 2024

- Resolved production API ingestion failures in Azure-hosted MySQL/CSV pipelines by validating multi-tenant DRF schemas, restoring customer onboarding within 2 days.
- Designed and tested 30+ Django REST Framework API endpoints for authentication and CSV ingestion using DRF serializers and `djangorestframework-csv`.

PROJECTS

AI Nexus | Next.js, TypeScript, Express, FastAPI, Anthropic Claude, PostgreSQL, pgvector, MCP, Docker, GCP

Jul 2026

- Built a full-stack AI engineering platform with 10 interactive chapters demonstrating RAG, AI agents, MCP tool-calling and Anthropic Claude API integration.
- Architected 4 containerized microservices (Next.js, Express, FastAPI, MCP server) exposing 15 REST endpoints, deployed to Google Cloud Run through a GitHub Actions CI/CD pipeline secured with Workload Identity Federation.
- Integrated Anthropic Claude, Voyage AI embeddings and WeatherAPI alongside hand-rolled semantic caching, TextRank summarization and ROUGE-L/embedding-based evaluation.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

AI/ML: LLM APIs (Anthropic Claude, Google Gemini), Retrieval-Augmented Generation (RAG), Embeddings, Vector Search (HNSW), AI Agents, Model Context Protocol (MCP), LLM Evaluation

Frameworks & Libraries: React.js, Next.js, Node.js, Express, FastAPI, Django REST Framework (DRF), Sequelize

Tools & Platforms: Docker, GCP (Cloud Run), Azure, Vercel, Git, GitHub Actions, CI/CD

Databases: PostgreSQL, pgvector, MySQL, MongoDB, Firestore

EDUCATION

University of California, Santa Cruz

Santa Cruz, CA

B.S. in Computer Science

Mar 2026
